

2 Point Perspective Step by Step

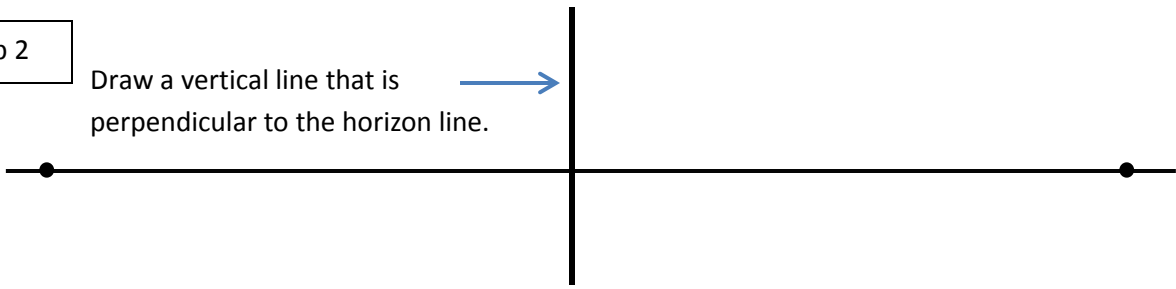

Step 1

Draw the horizon line and 2 vanishing points at each end of the horizon line.

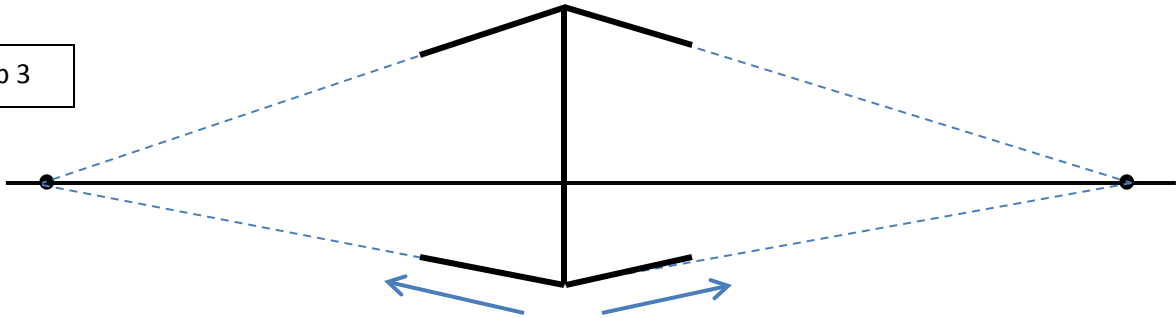

Step 2

Draw a vertical line that is perpendicular to the horizon line.

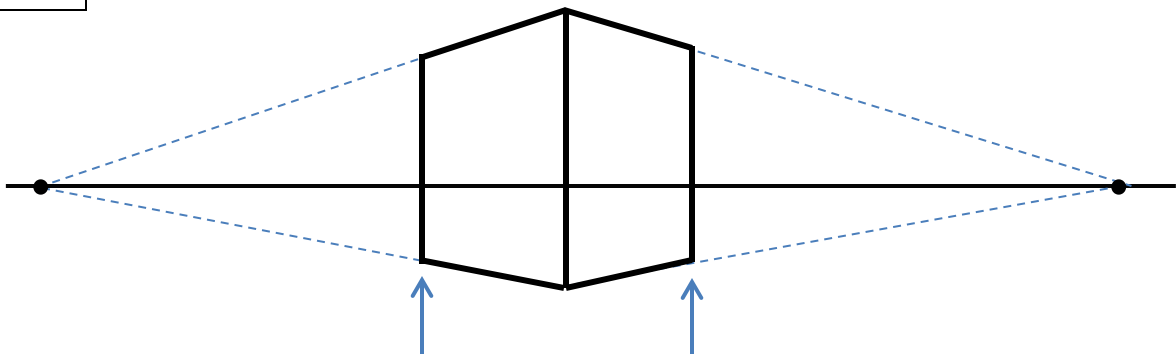

Step 3

Draw diagonal lines that connect from the top and bottom of the vertical line that go to each vanishing point on the right and the left.

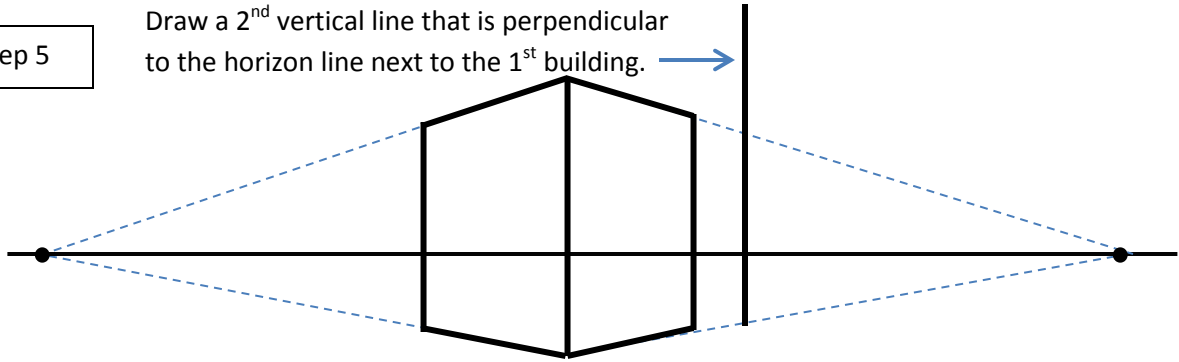

Step 4

Draw the vertical lines that are parallel to the center vertical line to complete the sides of the building.

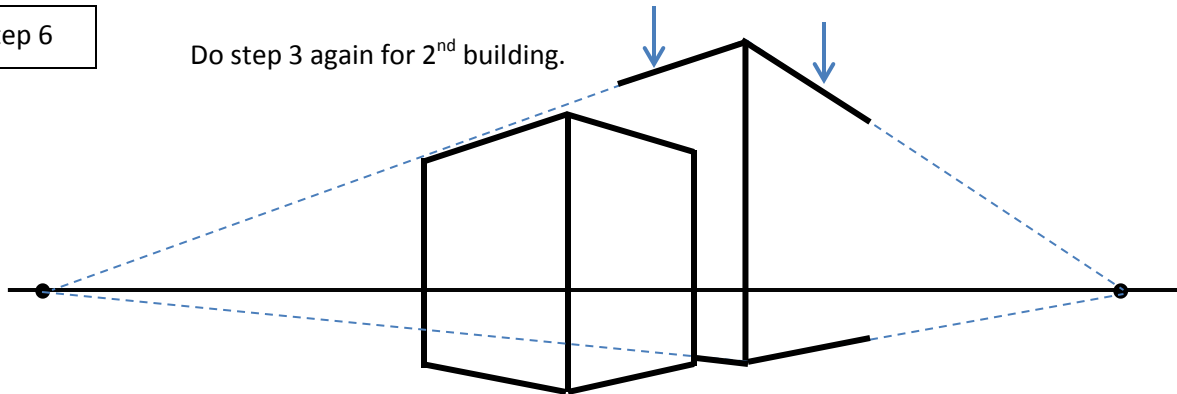

Step 5

Draw a 2nd vertical line that is perpendicular to the horizon line next to the 1st building.

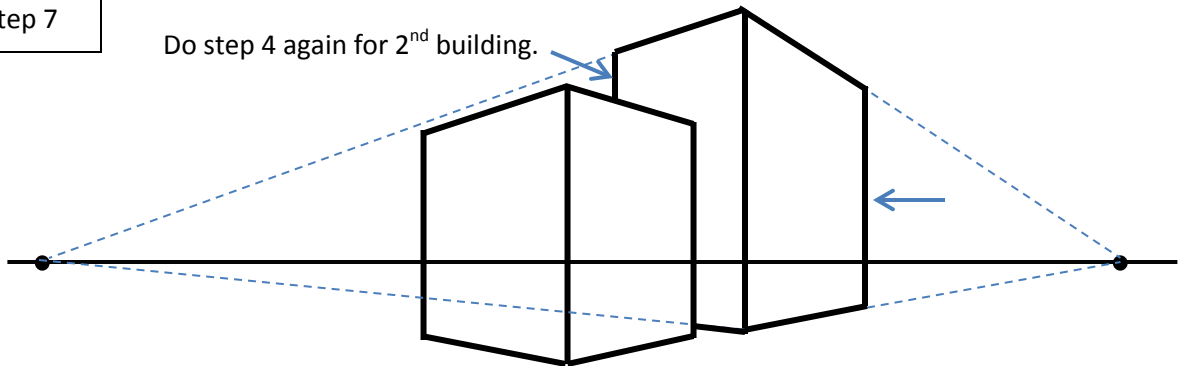

Step 6

Do step 3 again for 2nd building.

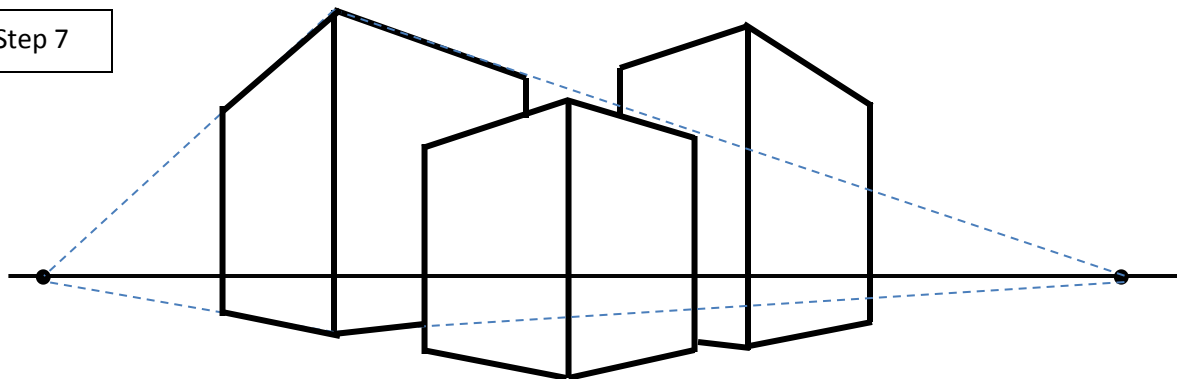

Step 7

Do step 4 again for 2nd building.

Step 7

Draw more buildings. See other handouts for additional details.
